

DETAILED PAINT SPECIFICATION

Detailed Paint Specification

This specification has been prepared following inspection of the project and outlines the recommended preparation procedures, coating systems and estimated material requirements for the surfaces included within this quotation. All recommendations are based on the recorded site conditions at the time of inspection.

SPECIFICATION SECTIONS

1

Purpose

The purpose of this specification is to provide a structured coating recommendation for each inspected surface included within this quotation. The document should be used together with the official quotation and manufacturer product data sheets.

General Application Notes

- Ensure all surfaces are clean, dry and free from contaminants before coating.
- Moisture levels should fall within manufacturer recommendations before application.
- All preparation work should be completed before primers or finish coats are applied.
- Observe all manufacturer drying and recoat times. Application should only be carried out under suitable environmental conditions.

Test

INTERIOR · INTERIOR_WALLS

Preparation Requirements

Inspect existing coating.

Application Requirements

Apply 2 coats of Precision Paint.

Coating System

Coating System	Technical Data Sheet	Spread Rate	DFT (µm)	Application Methods
Precision Paint	—	2.99	—	Brush / Roller / Spray

Surface / Product

Item No.	Surface	Surface Type	Product	Surface Area (m²)	Coverage (m²/L)	Amount Required (L/kg)	Pack Size	Units of Paint	Unit Price (excl. VAT)	Total Price (excl. VAT)	Paint Cost per m² (excl. VAT)
1	Precision Test	Interior	Precision Paint	12.35	3.00	8.26	2	2	R 80.00 / 8.26	R 80.00	R 6.48

Project Pricing Summary

Subtotal (excl. VAT)	R 80.00
VAT	R 12.00
Grand Total	R 92.00

Important Notes

Material quantities are estimates based on the recorded surface areas and selected coating systems. Actual consumption may vary depending on substrate porosity, application method and site conditions.

This specification should be read together with the official quotation and any manufacturer technical data sheets supplied with the selected coating products.
